

Snap-On Cap Pressing.....

With The Travtec Mini-Press 2

Automatic pressing of snap-on caps for tubs, jars & cans

- Caps can be manually, or machine placed whilst the container is travelling along a conveyor, replacing hand pressing of closures, eliminating wrist strain and injury.
- Adjustment between container sizes takes only seconds with an integrated hand-wind and angular adjustment compensating for different container heights.
- The variable speed drive is easily synchronised with existing conveyors, and the belt drive ensures positive control and guidance, gently pressing the cap without shock force.
- Integrated floor stand with outrigger stabiliser
- The innovative design is easily attached to most conveyors within 1 hour.

TECHNICAL SPECIFICATION:

Construction:	<i>Stainless steel construction. Quick-change design. UKCA & CE Certified.</i>
Controls:	<i>Low voltage brushless variable speed DC Motor. IP66 Rated.</i>
Power Required:	<i>100-240 v AC Single phase. 0.5 kW loading.</i>
Speed:	<i>Variable up to 30 mtrs per minute.</i>
Product Sizes:	<i>Width: 20 - 80mm (Up to 130mm on Wide Version); Height: 10 - 350mm.</i>
Dimensions:	<i>Length: 550mm; Width: 200mm; Height: 1500mm.</i>
