

Integrated Cap Pressing.....

With The Travtec Pressino

Automatic pressing of snap-on caps for tubs, jars & cans

- Caps can be manually, or machine placed onto the integrated conveyor, replacing hand pressing of closures, eliminating wrist strain and injury.
- Adjustment between container sizes takes only seconds with an integrated hand-wind and angular adjustment compensating for different container heights.
- The variable speed drive is a stand-alone, compact unit complete with its own synchronised conveyor. This ensures positive control and guidance, gently pressing the cap without shock force.
- The Pressino comes with an integrated floor stand for off, or on-line operation and is manufactured in stainless steel.

TECHNICAL SPECIFICATION:

| | |
|------------------------|--|
| Construction: | <i>Stainless steel construction. Quick-change design. UKCA & CE Certified.</i> |
| Controls: | <i>Low voltage brushless variable speed DC Motors. IP66 Rated.</i> |
| Power Required: | <i>100-240 v AC Single phase. 0.5 kW loading. 50/60 Hz.</i> |
| Speed: | <i>Variable up to 30 mtrs per minute.</i> |
| Product Sizes: | <i>Width: 20 - 80mm Height: 10 - 350mm.</i> |
| Dimensions: | <i>Length: 850mm; Width: 400mm; Height: 1500mm.</i> |
