# TinyTampino *turbo*

tabletop tamper-evidence

Tamper-evident labels semi-automatically applied to cartons

The TinyTampino *TURBO* tabletop unit is designed as an off-line system for semi-automatically applying permanent tamper-evident labels to the closure of cartons.

It is *turbocharged* for accurate label positioning, and is quick, easy and safe to operate, with the active movement being totally under operator control.

Advanced design for difficult to control labels. Includes integrated cycle counter.

Minimum capital outlay with maintenance-free operation and robust construction.

See the TinyTampino *TURBO* on you tube at: https://youtu.be/fquIF7CaeMY

TECHNICAL SPECIFICATION:

Construction:	*Stainless steel construction. Manual operation with semi-automatic application. Quick-adjustment design. UKCA & CE Certified. Turbo assisted label control.*
Controls:	*On/Off Switch. Label applicator solid state control.*
Power Required:	*24v DC via External PSU (supplied). 1.5 kW loading.*
