

# **Auto-Caplicator**

*Automatically applies overcaps & lids*

Automatic application of snap-on caps for tubs, jars & cans

Modular System Consisting of:

Floor level hopper/elevator sorts caps/lids, orientating them before feeding into system.

Capchute accurately controls caps/lids before applying onto container whilst travelling along the conveyor.

The variable speed twin-belt drives are easily synchronised with existing conveyors ensuring positive control and guidance onto container.

Mini-press cap pressing unit gently presses the cap onto container without shock force.

The innovative design is easily attached to existing conveyors with minimum disruption.

**See the Auto-Caplicator on YouTube at: [https://youtu.be/ q3Srnl0keA](https://youtu.be/q3Srnl0keA)**

## **TECHNICAL SPECIFICATION:**

**Construction:** *Stainless steel construction. Quick-change design. UKCA & CE Certified*

**Controls:** *Low voltage brushless variable speed DC Motors. IP66 Rated.*

**Power Required:** *220-240 v AC Single phase. 0.5 kW loading.*

**Speed:** *Variable up to 20 mtrs per minute.*

**Product Sizes:** *Diameter 40 - 100mm; Height: 80 - 150mm.*

**Dimensions:** *Length: 1550mm Width:500mm; Height: 1700mm.*
