

T-200 *thermal inkjet printing conveyor*

Integrated Tabletop Printing Conveyor

The T-200 T.I.J. printer is designed as an off-line system for applying printed data to packaging items for batch & LOT, expiry dates, time stamps & barcodes.

It is quick, easy and safe to operate, automatically applying hi-resolution print, accurately & efficiently onto a wide range of porous & non-porous substrates.

Minimum capital outlay. High quality conveyor with disposable inkjet cartridges for economical & consistent printing.

Clean, maintenance-free design with robust construction.

See the T-200 on Youtube: <https://youtu.be/0H5IHOWF4iE>

TECHNICAL SPECIFICATION:

Construction:	<i>Stainless steel framework. Manual operation with automatic application Quick-adjustment design. UKCA & CE Certified.</i>
Controls:	<i>On/Off Switch, HMI, T.I.J. Printer solid state control.</i>
Power Required:	<i>100-250 v AC Single phase. 1.5 kW loading.</i>
Throughput:	<i>Up to 50 prints per minute.</i>
Print Sizes:	<i>2mm - 12.7mm print height; 200 mm length with multiple lines.</i>
Product Sizes:	<i>40-200mm length; 40-200mm width. 0-160mm Height.</i>
