

# T-311 Pouchcoder

## Integrated Feeder/Coder for Pouches, Sleeves & Flat Cartons

The T-311 Thermal Inkjet Pouchcoder is designed as an off-line system for applying printed data to packaging items for batch & LOT, expiry dates, time stamps & barcodes.

It is quick, easy and safe to operate, automatically applying hi-resolution print, accurately & efficiently onto a wide range of porous & non-porous substrates.

Minimum capital outlay. High quality feeder/conveyor with disposable inkjet cartridges for economical & consistent printing.

Clean, maintenance-free design with robust construction.
